

# MIG Specialist Datasets: Adult Social Care from Liquidlogic

## Information Sheet

### Product overview

Our Adult Social Care Dataset provides a real-time view of social care data from the Liquidlogic Adults' Social Care System (LAS) and is designed to provide clinicians with a more comprehensive view of a patient's medical history.

### Features and benefits

The Adult Social Care Dataset from Liquidlogic is provided as a real-time HTML view or structured data and includes six categories of information:

1. Patient
2. Allocated Case Worker
3. Associated Carer
4. Disability
5. Risk Type
6. Case Details

#### Faster, improved decisions

Real-time data ensures that clinical decisions are based on up-to-date information. This saves time and effort for the clinician and leads to more satisfying encounters because time is not spent filling in the gaps.

#### Patients tell their story once

Bi-directional sharing between health and social care teams ensures patient care is better co-ordinated, which improves patient satisfaction and safety.

#### Improves safety of clinicians and patients

By having a complete picture of a patients' health and social care record, clinicians are better prepared for challenging situations. It also supports safeguarding work.

#### Saves time

Structured data can be seamlessly integrated within the consuming system with a single sign-on, this saves duplication of effort and errors in patient data management.

#### Supports data analysis

Structured data can be manipulated for analysis work and reporting to help improve care planning and monitor outcomes.

**Our portfolio of Specialist Datasets provide additional feeds of real-time patient information and can be used alongside the Detailed Care Record (DCR). External datasets can also feed back into the primary care record.**

Our current datasets include:

- Adult Social Care Dataset from Liquidlogic
- Community, Mental and Child Health Dataset from Servelec Rio
- Acute Dataset from Teleologic
- EMIS Journal View - last 12 months of Primary and Community Care encounters (EMIS only)
- Electronic Palliative Care Coordination systems (EPaCCs)
- Long term conditions and crisis care
- Special Patient Notes.

Please check out our [website](#) for more detail on our Specialist Datasets and solutions.

# Case Study

## Connecting live health and social care data across Cumbria

Healthcare professionals across Cumbria are benefiting from bi-directional data flows using technology from Healthcare Gateway. Since launching in the region in 2011, The Medical Interoperability Gateway (MIG) has provided live information and datasets for health and social care, when they need it. Part of a regional record sharing project, live data is now being viewed by health and social care professionals over 90,000 times per month. Read the case study [here](#).

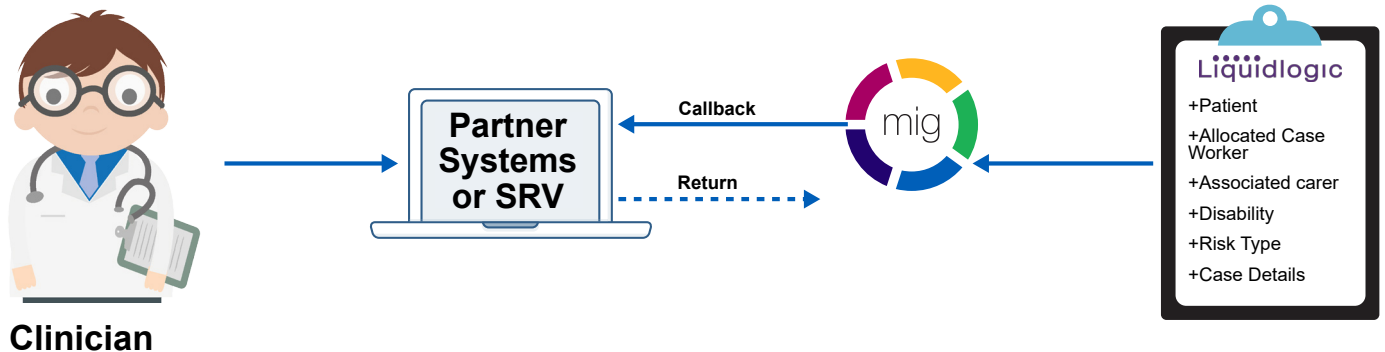

*“To provide the best care possible for citizens we (health & social care) need to be able to share the right information in real time to our front line staff. Working with our Adult Social Care colleagues in Cumbria and utilising the MIG functionality has realised the vision of bi-directional real-time record sharing and will clearly benefit service users and staff, helping to make us a great place to be cared for and a great place to work.”*

Dr William Lumb, GP Sedbergh and Clinical Lead East integrated Care Community,  
Clinical Director Integrated Services Care Group, Bay Health & Care Partners

## How does it work?

## What next?

We offer a fully managed service which is tailored to your organisation with dedicated teams to support you.

### Set-up

Our team of experienced PRINCE2 qualified project managers will support the integration process and work with your team to ensure the integration runs smoothly.

### Dependencies

There are a number of variables that must be in place to utilise this dataset:

- Sharing agreements in place
- Consuming system accredited for Service Discovery Locator and DCRv2
- HSCN/N3 connection
- API from Liquidlogic.

If you would like to view this data within the EMIS Web frame, you would also need the MIG GP Consuming Portal to enable the views – please speak to us about this solution.

### Cost

To find out how we can tailor a package for you, call 0845 601 2642 or [contact us](#).

Our website is the best place to find out about our products and services.
